Subject: GHG comment language for scoping of state rte. 30, Utah
Attachments: GFG StateRte 30 scoping ltr.docx

Justin,

With all the focus on Dewey-Burdock GRG UIC analysis, I forgot that I needed to get my comment letter language to you. As noted in the short attached background, State route 30 is a relatively small transportation project that is being completed as an EIS (versus EA) because of the potential impact to a large wetland. It is within an air-quality nonattainment area.

This letter is due Friday, October 21 so I'm not providing a large turn-around time for your review. I think it is pretty simple since the project is in scoping. Please see the attached.
